DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-6, 8-26, drawn to controlling inbound traffic by monitoring outbound flow rates, classified in class 709, subclass 225.
- Claims 7 and 27, drawn to controlling outbound flow rates by monitoring inbound traffic, classified in class 709, subclass 232.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions monitor and regulate different communication links and have different effects of dropping inbound requests (invention I) or dropping outbound responses (invention II).
- 3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II (Group II search is not required for Group I), restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jason D Cardone whose telephone number is (703)

305-8484. The examiner can normally be reached on Mon.-Thu. (9AM-6PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's
